DESCRIPTION

XLR male audio connector with robust chassis and panel mounting

The SM-573 connector is a reliable, high-performance solution for professional audio projects. Designed specifically for installation in 19-inch chassis and rack panels, this XLR male connector ensures a stable and secure connection in sound systems, recording studios, and live events. Its black finish provides a discreet and professional aesthetic.

Stability and performance in audio connections

- Firm installation: The SM-573's design allows for robust mounting in chassis and rack panels, providing a durable installation that withstands heavy use.
- Professional quality: Ideal for applications requiring high sound quality and reliable connections in demanding environments such as concerts, studios, or fixed installations.
- Compact design: Its lightweight and efficient structure makes it easy to integrate into any equipment configuration, without compromising performance or aesthetics.

Why choose SM-573?

- Secure connections: The panel mounting ensures a solid connection, preventing accidental disconnection during use.
- Durability: Built with durable materials, the SM-573 is designed to withstand the demands of everyday life in high-performance environments.
- Universal compatibility: Its standard XLR male format allows it to be easily integrated into most professional audio equipment.

TECHNICAL CHARACTERISTICS

CONNECTOR	Male XLR
CHARACTERISTICS	Chassis or panel mounting for 19' rack.
COLOUR	Black
OPTIONAL	FRP-31XLR: Rack panel 19" machined for XLR
