

# AIP-PLAYER

IP AUDIO PLAYER AND SIP CLIENT

- ✓ Enables audio reception via streaming over a local area network (LAN)
- ✓ Audio channel selection and setup via PC
- ✓ General purpose isolated inputs and outputs
- ✓ PC software with automatic device detection

ESPECIALLY RECOMMENDED IN:

All sectors

## DESCRIPTION

AIP-PLAYER is an IP audio player and SIP client, which allows audio playback over the local area network (LAN). Plays background music, instant and scheduled messages, alarms, and voice prompts.

It incorporates 1 input for triggering events by contact closure or opening and 1 output relay for external device control and third wire control.

AIP is a 100% scalable solution, with no limit to the number of AIP devices and channels, auto-discovery service when connected to the network and intuitive configuration and control software (AIP-Go).

Perfect for public address and background sound installations for restaurants, schools, cafeterias, supermarkets, shopping centres, etc.

## TECHNICAL CHARACTERISTICS
