

AIP-IO-8R

DESC. CORTA

DESCRIPTION

AIP-IO series allows programmable isolated inputs for contact closure event activation and output relays for external device control and third-wire control.

You can choose the combination that best suits your installation, in groups of 4, with up to 16 inputs or relays per device.

AIP-IO-8R has 8 programmable general purpose outputs for external device control and third-wire control.

AIP ecosystem is a 100% scalable solution, with no limit to the number of AIP devices and channels, auto-discovery service when connected to the network and intuitive configuration and control software (AIP-Go).

For professional installations in large shopping centres, schools, office buildings, etc.

TECHNICAL CHARACTERISTICS

FEATURES	General purpose 8-output device for IP audio system. Remote update via PC software or locally via USB.
INPUTS	1 ethernet 10/100 Base T, RJ-45 USB port for software update
OUTPUTS	8 output relays for external device control and third-wire control, euroblock
