AIP-IO-8S

ISOLATED 8-INPUT DEVICE FOR IP AUDIO SYSTEM

DESCRIPTION

AIP-IO series allows programmable isolated inputs for contact closure event activation and output relays for external device control and third-wire control.
You can choose the combination that best suits your installation, in groups of 4, with up to 16 inputs or relays per device.

AIP-IO-8S has 8 programmable isolated inputs for contact closure event activation.

AIP ecosystem is a 100% scalable solution, with no limit to the number of AIP devices and channels, auto-discovery service when connected to the network and intuitive configuration and control software (AIP-Go).

For professional installations in large shopping centres, schools, office buildings, etc.

TECHNICAL CHARACTERISTICS

FEATURES	8 isolated input device for IP audio system. Remote update via PC software or locally via USB.
INPUTS	1 ethernet 10/100 Base T, RJ-45 8 isolated programmable input for contact closure event activation, euroblock USB port for software update
