DESCRIPTION

MICBASE-M desktop base: Full control for gooseneck microphones

The MICBASE-M microphone base is a versatile and efficient solution for the control of condenser microphones with Phantom 9 to 52 V DC power. With three operating modes and a compact design, this base is ideal for professional installations requiring simple and precise microphone management.

Multiple operating modes for versatility

Three operating modes: The MICBASE-M features ON-OFF, PTT (Push-to-Talk) and PTM (Push-to-Mute) modes, allowing flexible control according to the needs of the environment.

LED indicator: Its status indicator light provides clear visual feedback on the operation of the microphone.

Professional connections: Equipped with 3-pin XLR inputs and outputs, it offers a balanced signal to ensure interference-free, long-distance audio transmission.

Why choose MICBASE-M?

The MICBASE-M base is ideal for installers and integrators looking for a secure, high-performance solution for their professional sound projects. Its ergonomic design, lockable gooseneck microphone and multiple operating modes make it the perfect choice to suit different applications and professional environments.
