DESCRIPTION

XLR female connector SM-568: Secure and professional connection for your sound equipment

The SM-568 connector is a female XLR connector designed to ensure a secure and efficient connection in professional sound installations. This connector is ideal for microphones, audio equipment, and other devices that require stable, high-quality connections. Its compact and durable design makes it the preferred choice for both sound technicians and users looking for reliability in their audio installation.

Maximum compatibility and durability

- Universal compatibility: The SM-568 is compatible with any equipment using XLR connectors, making it perfect for a wide range of applications.
- Robust and reliable: Constructed from high-quality materials, this connector ensures a long service life, even in demanding environments.
- Outlet for 4 to 6 mm cable: The design includes a cable exit hole that accommodates cables of different thicknesses, ensuring a clean and professional installation.

Why choose SM-568?

The SM-568 female XLR connector stands out for its construction quality, its compatibility with professional audio equipment, and its robustness. It is the ideal choice for those who need reliable and durable audio connections in recording studios, live sound installations, or AV systems.
