DESCRIPTION

Professional quality connection for your sound equipment

The SM-671 is an audio cable designed to provide a stable, high-quality transmission between equipment with 2 x RCA and 2 x XLR male connectors. Ideal for connecting devices that require stereo signals, this cable is a robust and reliable solution in professional and home environments.

High durability and resistance

Stereo connection: specifically designed to ensure excellent transmission of stereo audio signals.

Robust construction: its cable has copper conductors and cotton reinforcements, providing durability and resistance to prolonged use.

Advanced protection: Aluminium Mylar shielding and braided wires reduce interference, ensuring clean, noise-free sound quality.

Why choose SM-671?

Professional connectors: RCA and XLR terminals ensure a firm and stable connection between devices.

High-quality materials: with a length of 1.5 metres and a robust PVC outer jacket, this cable is ideal for both mobile and fixed applications.

Versatility: perfect for use in recording studios, professional sound systems, or even in home hi-fi installations.

TECHNICAL CHARACTERISTICS

CONNECTOR A	2 x RCA
CONNECTOR B	2 x XLR male
CHARACTERISTICS	Connection for stereo signals. Two parallel cables. Internal structure consisting of, Cable with copper conductors (30 wires / 0.1 mm Ø) and PE sheath (1.8 mm Ø). Structural reinforcement with cotton threads. Shielding with aluminium Mylar foil and stranded wires (96 wires / 0.1 mm Ø CCS). PVC outer casing (6 mm Ø). Special for stereo signal connection.
COLOUR	Black
LENGTH	1.5 m
