DESCRIPTION

Professional audio cable for balanced connections

The SM-672 is a high-quality audio cable that guarantees a balanced connection between audio devices, thanks to its 6.3 mm TRS jack and XLR male connector. Designed to ensure clear, interference-free signal transmission, this cable is ideal for recording studios, live sound equipment, and any professional audio application.

Reliable performance and durability

The SM-672 cable is composed of high-quality materials for superior performance and long-term durability:

- Balanced connection reduces noise and interference, ensuring impeccable audio quality.
- High purity copper in the conductors, consisting of 30 wires of 0.1 mm diameter, protected by a polyethylene (PE) sheath to ensure perfect insulation.
- Structural reinforcement with cotton threads and aluminium Mylar shielding with stranded wires (96 wires of 0.1 mm CCS), guaranteeing greater resistance to electromagnetic interference.
- 6 mm diameter PVC outer sheath provides flexibility and protection, ideal for continuous use in demanding environments.

Why choose SM-672?

The SM-672 cable is the perfect choice for those looking for a reliable and professional solution for their audio connections. Its features and quality construction ensure clear and stable signal transmission, making it a must-have in sound installations where audio quality is paramount:

- Balanced connection ideal for audio line signals.
- High resistance and flexibility to adapt to different usage environments.
- Quality shielding protects against external interference, ensuring a clear signal.

This cable is intended for all types of users, from sound professionals to music enthusiasts who require a reliable product in their audio installations.

TECHNICAL CHARACTERISTICS

CONNECTOR A	TRS 6.3 mm jack
CONNECTOR B	Male XLR
