## DESCRIPTION

XLR female to XLR male audio cable SM-673: High quality connection and professional performance  
The SM-673 is an audio cable with XLR female to XLR male connectors, specifically designed to provide a balanced and stable connection. Ideal for professional sound applications, it is perfect for connecting microphones or balanced line signals, ensuring clear, interference-free audio transmission. With a length of 1.5 metres, this cable is the reliable choice for any audio installation.

High-quality construction for a flawless audio signal

Balanced connection: Provides clean, noise-free sound transmission, ideal for professional applications.

Long-lasting materials: Consisting of two copper wires, a cotton-wire reinforcement, and Aluminium Mylar shielding, the SM-673 guarantees effective protection against interference.

Structural reinforcement: Thanks to the 96 stranded CCS wires, the cable offers enhanced durability and resistance.

Why choose the SM-673 audio cable?

The SM-673 stands out for its robust construction and excellent performance, making it a reliable choice for professional users and audio enthusiasts alike. In addition, its PVC outer sheath ensures greater resistance and flexibility, facilitating its use in any environment.

## TECHNICAL CHARACTERISTICS

CONNECTOR B	Male XLR
CONNECTOR A	Female XLR
CHARACTERISTICS	Balanced connection. Mesh connected to the connector chassis. Internal structure consisting of, Two wires with copper conductors (30 wires / 0.1 mm Ø) and PE sheath (1.8 mm Ø). Structural reinforcement with cotton yarns. Shielding with aluminium Mylar foil and stranded wires (96 wires / 0.1 mm Ø CCS). PVC outer sheath (6 mm Ø). Specially designed for connection of microphones or balanced line signal.
COLOUR	Black
LENGTH	1.5 m
