DESCRIPTION

Professional audio connection with high quality and durability

The SM-673-10 is a XLR female to XLR male audio cable designed to ensure a balanced and stable connection, ideal for microphones and line signals. With a length of 10 metres and a black finish, this cable provides excellent transmission quality and is made of durable materials that ensure optimum performance even in demanding environments.

Superior performance and advanced structure

Balanced connection: The SM-673-10 guarantees interference-free signal transmission due to its balanced design.

High quality materials: Pure copper conductor (30 wires of 0.1 mm) and 1.8 mm polyethylene coating provide clear and accurate audio transmission.

Structural reinforcement: The cable includes cotton threads for strength and a layer of aluminium Mylar and CCS braided shielding, ensuring complete protection against noise and interference.

Why choose SM-673-10?

The SM-673-10 is the perfect choice for professionals and users looking for a reliable, high-performance audio connection. Its robust design and quality materials guarantee durability and clear sound, making it ideal for use on stage, in recording studios and other professional sound applications.

TECHNICAL CHARACTERISTICS

CONNECTOR A	Female XLR
CONNECTOR B	Male XLR
CHARACTERISTICS	<p>Balanced connection.</p> <p>Mesh connected to the connector chassis.</p> <p>Internal structure consisting of,</p> <p>Two wires with copper conductors (30 wires / 0.1 mm Ø) and PE sheath (1.8 mm Ø).</p> <p>Structural reinforcement with cotton yarns.</p> <p>Shielding with aluminium Mylar foil and stranded wires (96 wires / 0.1 mm Ø CCS).</p> <p>PVC outer sheath (6 mm Ø).</p> <p>Specially designed for connection of microphones or balanced line signal.</p>
COLOUR	Black
LENGTH	10 m
