## DESCRIPTION

Balanced connection and professional reliability for your audio equipment

The SM-673-5 is a 5 metre long XLR audio cable, designed to ensure a balanced and interference-free signal transmission. With high-quality XLR female and male connectors, this cable is ideal for connecting microphones or audio equipment that requires a clear, noise-free signal.

Superior build quality for long-lasting performance

**Balanced connection:** This cable provides a stable connection, minimising interference and ensuring a clean and clear signal.

**Robust materials:** It is built with high purity copper conductors and covered with an aluminium Mylar shielding mesh and stranded wires, which provides effective shielding against external noise.

**Structural reinforcement:** It incorporates cotton threads for durability, along with a 6mm PVC outer cover to protect it from wear and tear.

Why choose SM-673-5?

The SM-673-5 is a reliable choice for audio professionals and hobbyists who need a secure, high-quality connection. Whether for studio or live applications, this XLR cable guarantees excellent signal transmission and a long service life thanks to its quality components. The robust design and the shielding connected to the connector chassis ensure additional protection against damage or interference.

## TECHNICAL CHARACTERISTICS

CONNECTOR A	Female XLR
CONNECTOR B	Male XLR
CHARACTERISTICS	Balanced connection. Mesh connected to the connector chassis. Internal structure consisting of, Two wires with copper conductors (30 wires / 0.1 mm Ø) and PE sheath (1.8 mm Ø). Structural reinforcement with cotton yarns. Shielding with aluminium Mylar foil and stranded wires (96 wires / 0.1 mm Ø CCS). PVC outer sheath (6 mm Ø). Specially designed for connection of microphones or balanced line signal.
COLOUR	Black
LENGTH	5 m
