DESCRIPTION

Professional sound with high power and advanced control

The FORCE-X12DSP is a high power active loudspeaker designed to meet the most demanding needs of installers and engineering projects. Its robust construction and advanced features make it the ideal choice for professional sound applications, offering quality and versatility in any environment.

Exceptional performance and advanced features

Optimised power: Class D amplifier with a maximum output of 1,200 W peak.

Integrated DSP processor: It offers four EQ settings (Music, Club, Live and Speech) to suit every scenario.

Versatile connectivity: Bluetooth v5.3 with TWS function, balanced and auxiliary inputs, plus balanced XLR output for daisy-chain configurations.

Functional design: Compact housing, carrying handles and base with 35 mm pipe hole for easy installation.

Why choose FORCE-X12DSP?

High resistance: Quality materials with temperature and overload protection.

Powerful and precise sound: 12" woofer and compression driver with 90°H x 60°V coverage for an immersive acoustic.

Versatility in installation: M8 suspension points, aluminium back panel and LED lighting options on the front.

Lightweight and compact: With a weight of 16.6 kg and optimised dimensions for easy transport and installation.

The FORCE-X12DSP combines state-of-the-art technology, ergonomic design and outstanding acoustic performance, making it a complete solution for sound professionals looking for high quality and reliability.
